FISCAL YEAR 1975 FUNDS

U.S. DEPARTMENT OF HEALTH, EDUCATION AND WELFARE  
Public Health Service      National Institutes of Health

**DISCRIMINATION PROHIBITED**—Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, sex, age, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Public Health Service grants and awards program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

DHQP Publication No. (NIH) 75-1042

## **PREFACE**

The mission of the National Institutes of Health is to protect and improve the health of the American people. To achieve this goal, NIH conducts biomedical research in its own laboratories; provides grants to nonprofit organizations and academic institutions for research; provides grants for the training of research investigators; supports biomedical communications through programs and activities of the National Library of Medicine; and provides grants for facilities and other resources required for cancer research. In addition, the research contract mechanism is used under appropriate circumstances.

Listings of NIH grants and research contracts are prepared annually by the Division of Research Grants. This book presents a listing of research grants awarded from fiscal year 1975 funds.

## INTRODUCTION

### Coverage

This volume presents the research grants (including the research career program awards) awarded by the National Institutes of Health. Research grants awarded by other constituent agencies of the Public Health Service are not included in this volume.

The awards shown in this volume are those made from fiscal year 1975 funds, as well as a small number from fiscal year 1973 released funds, which were obligated in fiscal year 1975. The preponderance of fiscal year 1973 released funds were obligated in fiscal year 1974 and were shown in the publication for that year. Awards made from fiscal year 1973 released funds are designated as fiscal year 1973/75.

### Appendix

Organizations appearing in more than one geographical location, or requiring a clarifying comment, are listed in the Appendix in alphabetic sequence.

## TECHNICAL NOTE

### Organization Identification

In the presentation of grants made from fiscal year 1975 funds, emphasis is placed on listing the organizations in the city and State of the unit in which professional responsibility of the principal investigator lies. Study of the structure of grantee organizations in the United States (primarily universities and colleges, and State departments of mental health or their equivalents) has led to the following qualifications in the listing of their names:

1. Within a given city, if an institution of higher education is comprised of two or more campuses reporting directly to the central administration, each campus is listed separately.
2. In the listing of governmental organizations, Federal as well as non-Federal, the name of the parent department precedes that of the individual component, and the organization is listed as many times within a given city as there are components of the organization receiving grants.
3. If a foundation has been established for the purpose of receiving and administering funds for grants, the name and location of the organization having professional responsibility for the grant are shown rather than the name and location of the foundation. The name of the foundation is indicated in the appendix if it differs materially from the name of the organization.
4. If an association receiving a grant has a fixed national headquarters, the grants are listed at the headquarters location. If however, the association does not have a fixed headquarters, the grants are listed in the city shown for this organization in the Encyclopedia of Associations. These qualifications do not apply to foreign institutions or to some domestic organizations, because a systematic study of their organizational structure has not been made. Organizations which require a clarifying comment, or which appear in more than one geographical location are listed alphabetically in the appendix.

### Supplemental Awards

Only grants made from fiscal year 1975 funds and from fiscal year 1973/75 released funds are listed in this publication. Fiscal year 1975 supplemental awards to fiscal year 1975 grants, or fiscal year 1973/75 supplemental awards to fiscal year 1975 grants, or to fiscal year 1973/75 grants, are combined with and reported under the parent grant. However, supplemental grants awarded from fiscal year 1975 funds, or from fiscal year 1973/75 funds, to a parent grant awarded in a previous fiscal year are shown separately; if two or more such supplements were made during fiscal year 1975, these supplements are combined.

## ABBREVIATIONS

The NIH component supporting a grant is indicated by the code letters in the left-hand column. These code letters form part of the identification of the grant number.

<i>Code for supporting component</i>		<i>Abbreviation of supporting component</i>
	Institutes and Research Divisions.....	IRD

## APPENDIX

### Notes on Selected Organizations

Organizations appearing in more than one geographical location or requiring a clarifying comment are listed below in alphabetical sequence. Comments on certain foundations or on organizations whose names have changed since last year appear after the name of the organization. The tables in which the organizations may be found are shown in parentheses following their locations.

- Alcorn State University (formerly shown as Alcorn Agricultural and Mechanical College)--Lorman, Miss. (2)
- American Institutes for Research--Washington, D.C.; Pittsburgh, Pa. (2)
- Arctic Institute of North America (formerly shown at Washington, D.C.)--Arlington, Va. (2)
- Battelle Memorial Institute--Columbus, Ohio; Richland, Seattle, Wash. (2)
- Boston Health and Hospitals Department (includes awards to the Mallory Institute of Pathology Foundation)--Boston (2 units), Mass. (2)
- California State Health and Welfare Agency--Berkeley, Eldridge, Pomona, Sacramento, Calif. (2)
- California State University and Colleges--Bakersfield, Hayward, Long Beach, Los Angeles, Northridge, San Diego, San Francisco, Calif. (2,3)
- Charles Stark Draper Laboratory (formerly shown as part of Massachusetts Institute of Technology)--Cambridge, Mass. (2)
- Chicago Board of Health (includes awards to Chicago Health Research Foundation)--Chicago, Ill. (2)
- City University of New York--New York (9 units), N.Y. (2,3)
- Claremont Colleges System--Claremont (3 units), Calif. (2)
- College of Medicine and Dentistry of New Jersey--Jersey City, Newark, Piscataway, N.J. (2,3)
- Cornell University--Ithaca, New York, N.Y. (2,3)
- Denver Health and Hospitals Department (includes awards to Denver Health Research Foundation)--Denver, Colo. (2)
- Eastern Virginia Medical Authority--Norfolk (2 units), Va. (2,3)
- Eye Research Institute of Retina Foundation (formerly shown as Retina Foundation)--Boston, Mass. (2)
- Federated Medical Resources (formerly shown in Philadelphia, Pa.)--Honey Brook, Pa. (2)
- Florida Department of Health and Rehabilitative Services--Jacksonville, Vero Beach, Fla. (2)
- Gulf South Research Institute--New Iberia, New Orleans, La. (2)
- Howard University--Boston, Cambridge, Mass. (2,3)
- Indiana University System--Bloomington, Indianapolis, Ind. (2,3)
- Institute of Applied Physiology and Medicine (formerly shown as Institute of Environmental Medicine and Physiology)--Seattle, Wash. (2)
- Johns Hopkins University--Baltimore, Silver Spring, Md. (2,3)

Kaiser Foundation Hospitals--Los Angeles, Oakland, San Francisco, Calif.; Portland, Ore. (2)

Latter-Day Saints Hospital System--Salt Lake City (2 units), Utah (2,3)

Linus Pauling Institute of Science and Medicine (formerly shown as Institute of Orthomolecular Medicine)--Menlo Park, Calif. (2)

Los Angeles County Health Services Department--Downey, Los Angeles (2 units), Torrance, Calif. (2,3)

Louisiana State University System--Baton Rouge, New Orleans (2 units), Shreveport, La. (2,3)

Marshfield Medical Foundation (formerly shown as Marshfield Clinic Foundation for Medical Research and Education)--Marshfield, Wis. (2)

Maryland State Department of Health and Mental Hygiene (includes awards to Friends Medical Sciences Research Center, Inc.)--Catonsville, Md. (2)

Massachusetts General Hospital--Belmont, Boston, Mass. (2,3)

Massachusetts Office of Human Services (includes awards to the Massachusetts Mental Health Research Corporation)--Boston, Medfield, Mass. (2)

Mayo Foundation--Rochester (2 units), Minn. (2,3)

Mississippi State University (formerly shown at State College, Miss.)--Mississippi State, Miss. (2)

New Jersey State Department of Institutions and Agencies (includes awards to the New Jersey Mental Health Research and Development Fund)--Skillman, N.J. (2)

New York City Health Services Administration (includes awards to the Medical and Health Research Association of New York City)--New York (2 units), N.Y. (2,3)

New York State Department of Health (includes awards to Health Research, Inc.)--Albany, Buffalo, N.Y. (2,3)

New York State Department of Mental Hygiene (includes awards to New York State Research Foundation for Mental Hygiene)--Albany, Buffalo, New York (3 units), Orangeburg, N.Y. The Rockland Psychiatric Center at Orangeburg was formerly shown as Rockland State Hospital. (2)

North Carolina Department of Human Resources (includes awards to the North Carolina Foundation for Mental Health Research)--Raleigh, N.C. (2)

Northwestern University--Chicago, Evanston, Ill. (2,3)

Oregon State Higher Education System--Corvallis, Eugene, Monmouth, Portland (2 units), Ore. The University of Oregon Health Sciences Center in Portland includes the medical and dental schools which were formerly shown separately. (2,3)

Pennsylvania State University--Hershey, University Park, Pa. (2,3)

Purdue University (formerly shown at Lafayette, Ind.)--West Lafayette, Ind. (2,3)

Rush-Presbyterian-St. Luke's Medical Center--Chicago (2 units), Ill. (2,3)

Rutgers University--New Brunswick, Newark, N.J. (2,3)

Sidney Farber Cancer Center (formerly shown as Children's Cancer Research Foundation)--Boston, Mass. (2)

Southern Illinois University--Carbondale, Edwardsville, Ill. (2)

Southern University and Agricultural and Mechanical College--Baton Rouge, New Orleans, La. (2)

State University of Florida System--Boca Raton, Gainesville, Tallahassee (2 units), Tampa, Fla. (2,3)

State University of New York--Albany, Binghamton, Buffalo (2 units), New York, Oneonta, Oswego, Plattsburgh, Stony Brook, Syracuse (2 units), N.Y. (2,3)

# NATIONAL INSTITUTES OF HEALTH

Research and Development  
Contracts

FISCAL YEAR 1975 FUNDS

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE  
Public Health Service      National Institutes of Health

**DISCRIMINATION PROHIBITED**—Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, sex, age, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Public Health Service grants and awards program, like every program or activity receiving financial assistance from the Department of Health, Education, and Welfare, must be operated in compliance with this law.

# NATIONAL INSTITUTES OF HEALTH

## Research and Development Contracts

### FISCAL YEAR 1975 FUNDS

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE  
Public Health Service                      National Institutes of Health

DHEW Publication No. (NIH) 76-1044

Prepared by  
NATIONAL INSTITUTES OF HEALTH  
DIVISION OF RESEARCH GRANTS  
Statistics and Analysis Branch

## **PREFACE**

The mission of the National Institutes of Health is to protect and improve the health of the American people. To achieve this goal, NIH conducts biomedical research in its own laboratories; provides grants to nonprofit organizations and academic institutions for research; provides grants for the training of research investigators; supports biomedical communications through programs and activities of the National Library of Medicine; and provides grants for facilities and other resources required for cancer research. In addition, the contract mechanism is used under appropriate circumstances.

Listings of NIH grants and contracts are prepared annually by the Division of Research Grants, based on records contained in the NIH central record system (IMPAC). This book presents a listing of contracts awarded from fiscal year 1975 funds.

### *Appendix:*

Notes on Selected Organizations.....	97
--------------------------------------	----

## INTRODUCTION

### *Coverage*

This volume includes research and development and cancer control contracts which were awarded by the National Institutes of Health from fiscal year 1975 funds and which were reported to the NIH central record system (IMPAC) as of December 1, 1975. Contracts reported in other systems at NIH are excluded from this report.

The awards shown in this volume are those made from fiscal year 1975 funds, as well as a small number from fiscal year 1973 released funds which were obligated in fiscal year 1975. The preponderance of fiscal year 1973 released funds were obligated in fiscal year 1974 and were shown in the publication for that year.

### *Appendix*

Organizations appearing in more than one geographical location, or requiring a clarifying comment, are listed in the appendix in alphabetic sequence.

## TECHNICAL NOTE

### *Explanation of the Contract Mechanism*

The increasing importance of research contracts in the NIH extramural research programs has generated considerable analysis and discussion covering, among other aspects, the development of criteria for use of the contract mechanism. These criteria, as listed in the NIH Guide for Grants and Contracts (Vol. 2, No. 7), are as follows:

**BASIC CRITERIA:** Contracts are used for support of research and development when one or more of the following considerations obtain:

- a. the awarding Institute or Division has identified a need for certain research work to accomplish its mission and has determined that the work must be done outside its own facilities and the initiative for undertaking the activity originates primarily within the awarding unit (Institute or Division) of NIH;
- b. the objective is the acquisition of a specified service or end product;
- c. the collaboration of a number of institutions must be obtained, and work must be coordinated or carried on in a comparable manner by all of these so that the data collected can be combined for statistical analysis; or
- d. the NIH awarding unit participates in the degree necessary to accomplish its mission in the direction and control over the manner of performance or timing of the work.

**COROLLARY CRITERIA** used to define the contract as the preferred instrument of support may be:

- a. there is in addition a requirement for extensive participation by the staff of the awarding unit in the program design, direction, methodology, and evaluation;
- b. a need to capitalize immediately on information through directed initiation or changes in particular research and developmental projects.

**MANDATORY USE OF CONTRACTS:** When awards are made to commercial or industrial profit-making corporations, or when payment of an amount in excess of actual costs (i.e., profit or fee) is intended, the use of the contract as the instrument of support is required.

## *Organization Identification*

In this presentation of research contracts, emphasis is placed on listing the organizations in the city and State of the unit in which professional responsibility of the project director lies. The major part of contractual activities are conducted by universities, research foundations, and commercial and industrial organizations across the Nation. Study of grantee organizations in the United States has led to the following qualifications in the listing of their names:

1. Within a given city, if an institution of higher education belonging to a system of higher education is comprised of two or more components, and each component has equal standing in the system, the name of the component is shown after the name of the institution.
2. If a foundation has been established for the purpose of receiving and administering funds, the name and location of the organization having professional responsibility for the contract are shown rather than the name and location of the foundation. The name of the foundation is indicated in the appendix if it differs materially from the name of the organization.
3. In the listing of governmental organizations, Federal as well as non-Federal, the name of the parent department precedes that of the individual component, and there are as many listings within a given city as there are components of the organization receiving contracts.

In the case of industrial organizations and associations, professional responsibility is assumed to reside at the address of the contractor and not necessarily at the "site of performance." Divisions of parent organizations are shown if they are indicated on the contract, and subsidiaries are linked to parent organizations when the relationship is known.

These qualifications do not apply to foreign organizations or in all cases to organizations in the United States, either because of insufficient information or because of an organizational structure unique to a particular organization.

Organizations appearing in more than one geographical location or requiring a clarifying comment are listed in the appendix in alphabetic sequence.

## ABBREVIATIONS

The component of NIH supporting a contract is indicated by the code letters in the left-hand column. These code letters form part of the identification of the research contract number in table 2.

Statistics and Analysis Branch

## **PREFACE**

The mission of the National Institutes of Health is to protect and improve the health of the American people. To achieve this goal, NIH conducts biomedical research in its own laboratories; provides grants to nonprofit organizations and academic institutions for research; provides grants for the training of research investigators; supports biomedical communications through programs and activities of the National Library of Medicine; and provides grants for facilities and other resources required for cancer research. In addition, the contract mechanism is used under appropriate circumstances.

Listings of NIH grants and contracts are prepared annually by the Division of Research Grants, based on records contained in the NIH central record system (IMPAC). This book presents awards for training, construction, and medical libraries made from fiscal year 1975 funds.

## INTRODUCTION

### *Coverage*

This volume presents the training grants, traineeships and fellowships, cancer research facilities construction, and medical library grants awarded by the National Institutes of Health. Awards for training and construction made by other constituent agencies of the Public Health Service are not included in this volume.

The awards shown in this volume are those made from fiscal year 1975 funds, as well as a small number from fiscal year 1973 released funds which were obligated in fiscal year 1975. The preponderance of fiscal year 1973 released funds were obligated in fiscal year 1974 and were shown in the publication for that year. Awards made from fiscal year 1973 released funds are designated as fiscal year 1973/75.

### *Appendix*

Organizations appearing in more than one geographical location, or requiring a clarifying comment, are listed in the appendix in alphabetic sequence.

## TECHNICAL NOTE

### *Organization Identification*

In the presentation of grants made from fiscal year 1975 funds, emphasis is placed on listing the organizations in the city and State of the unit in which professional responsibility of the principal investigator lies. Study of the structure of grantee organizations in the United States (primarily universities and colleges, and State departments of mental health or their equivalents) has led to the following qualifications in the listing of their names:

1. Within a given city, if an institution of higher education is comprised of two or more campuses reporting directly to the central administration, each campus is listed separately.
2. In the listing of governmental organizations, Federal as well as non-Federal, the name of the parent department precedes that of the individual component, and the organization is listed as many times within a given city as there are components of the organization receiving grants.
3. If a foundation has been established for the purpose of receiving and administering funds for grants, the name and location of the organization having professional responsibility for the grant are shown rather than the name and location of the foundation. The name of the foundation is indicated in the appendix if it differs materially from the name of the organization.
4. If an association receiving a grant has a fixed national headquarters, the grants are listed at the headquarters location. If however, the association does not have a fixed headquarters, the grants are listed in the city shown for this organization in the Encyclopedia of Associations.

These qualifications do not apply to foreign institutions or to some domestic organizations, because a systematic study of their organizational structure has not been made. Organizations which require a clarifying comment or which appear in more than one geographical location are listed alphabetically in the Appendix.

### *Supplemental Awards*

Only grants made from fiscal year 1975 and 1973 released funds are listed in this publication. Fiscal year 1975 supplemental awards to fiscal year 1975 grants are combined with and reported under the parent grant. However, supplemental grants awarded from fiscal year 1975 funds, or from fiscal year 1973/75 funds, to a parent grant awarded in a previous fiscal year are shown separately; if two or more such supplements were made during fiscal year 1975, these supplements are combined.

## ABBREVIATIONS

The component of the National Institutes of Health supporting a grant is indicated by the code letters preceding the name of that component. These code letters form part of the identification of the grant number in the tables listing individual grants.

<i>Code for supporting component</i>		<i>Abbreviation of supporting component</i>
